

IRCIS SADI ALDABA

Profile

Full-Stack Developer with hands-on experience in developing, maintaining, and supporting web-based systems using **Laravel (PHP), MySQL, JavaScript, HTML, and CSS**. Actively supports end users by resolving system issues, implementing feature enhancements, and improving application usability. Eager to learn modern frameworks, improve code quality, and contribute to scalable, secure applications.

Work Experience

Full-Stack Web Developer

2025

-

To
Date

School Management System

- Developed and maintained a web-based School Management System using PHP and Laravel.
- Designed and implemented role-based access control (RBAC) for students, teachers, and administrators.
- Managed user accounts, permissions, and access levels within the system.
- Maintained the database, ensuring data integrity for academic and payment records.
- Investigated and resolved system bugs and data inconsistencies, including fixing payment ledger calculation issues.
- Deployed system updates and patches to the production server using SSH/PuTTY.
- Coordinated with DevOps for server maintenance and system restarts.

IT Staff/Tech Support

2023

-

2024

Land Registration Systems Inc (LARES) - Calbayog
November 2023 to April 2024.

I work as a Site Lead/IT STAFF for LARES from November 2023 up to April 2024. I handle all technical supports on the site, whatever happens on the site I would be responsible. I also handle all incident reports with the use of a software LARES developed.
